**2 YEAR
PARTS REPLACEMENT
WARRANTY**

The Rotaline range of hard wearing rotary tables, designed for both wet and dry applications, sets the standard for hygiene and value within the food industry.

Quality engineered with a robust 20mm thick UHMWPE top, mounted onto a stainless steel frame, the units have adjustable feet for ease of movement and a unique friction drive - providing enhanced operator safety.

Rotaline tables - available in three standard diameters as well as bespoke sizes - are designed to withstand aggressive cleaning regimes. The tops are FDA approved and all contact surfaces are easily accessed.

Because the table top's rotary action is powered by a quality motor gearbox with DOL starter (415v 3-phase) which connects to Rotaline's unique friction drive, there are no breaks in the top's surface and it offers an unprecedented level of personal safety. If anything obstructs its action, the top will automatically stop.

A range of options is also readily available.

- Upgrade to inverter speed control in stainless steel cabinet (240v single phase).
- Static plough guides to suit your product.
- Other special guides or modifications catered for.
- 25mm upstand fixed to edge.

We are also pleased to discuss other bespoke specifications.

Like all Crown products, the Crown Rotaline comes with a highly competitive price tag, backed by a two-years parts replacement warranty from a proven manufacturer with a 20 year track record in the industry.

Rotaline is the first choice for leading food processors throughout the UK. To find out why, contact us today for a quote.
